Polystyrene

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

It is a clear, colorless, tough plastic that is used in a wide range of applications, from disposable tableware to high-end consumer electronics. It is also used in the production of polystyrene foam, which is used for insulation and packaging.

Polystyrene is a member of the styrenic family of polymers, which also includes polystyrene copolymers and polystyrene block copolymers. It is a thermoplastic, meaning it can be melted and reformed into a new shape.

Polystyrene is a common material used in the production of many everyday items, such as plastic bottles, CD/DVD cases, and Styrofoam.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.

Polystyrene is a synthetic aromatic thermoplastic polymer made from the monomer styrene.
